

Physical size and ability are important considerations. To help determine whether a youngster is big enough for this Sportrax, have them stand up on the footpegs and grasp the handgrips. While the youngster holds this position, check that they have at least three inches of clearance between the ATV seat and the youngster's "seat of the pants." A rider needs at least three inches of clearance so they can stand up for balance and comfort, and to shift their body forward, backward and from side to side.

Also make sure your youngster can comfortably reach and work all the controls. For example, can they turn the handlebars all the way to the right and left? Can they easily use their feet to work the brake pedal and gearshift lever? Can they operate the throttle and brake levers while they hold onto the handgrips? If not, the youngster is not physically ready to ride this Sportrax.

Before you let a youngster ride an ATV, decide whether they are physically, mentally and emotionally ready to ride.
